Operations and tasks

No.	Operation / task	Result	Notes
1	Inspect equipment component 1	PASS	Thermal inspection confirmed stable bearing temperature across the full operating cycle; lubrication level was checked and recorded for follow-up during the next scheduled maintenance window.
2	Inspect equipment component 2	PASS	Verified during maintenance
3	Inspect equipment component 3	PASS	Verified during maintenance
4	Inspect equipment component 4	PASS	Verified during maintenance
5	Inspect equipment component 5	PASS	Verified during maintenance
6	Inspect equipment component 6	PASS	Verified during maintenance
7	Inspect equipment component 7	PASS	Verified during maintenance
8	Inspect equipment component 8	PASS	Verified during maintenance
9	Inspect equipment component 9	PASS	Verified during maintenance
